

Carbon Neutral Advantage

CREATING A LOW EMISSION SOUTHLAND

Carbon Neutral Advantage aims to create a competitive advantage and healthy environment for now and for future generations.

This initiative brings businesses and communities together to equip our economy and environment for a low emission future. It will help us respond to the challenge of climate change and changing legislation by accelerating the uptake of new technology and carbon reduction opportunities.

OBJECTIVES (2018-2021)

- Support businesses and communities to transition to a low emission environment
- Establish a regional greenhouse gas emission baseline
- Identify opportunities and undertake collaborative projects to reduce emissions
- Share learnings between communities, businesses and other regions
- Investigate feasibility of regional financial carbon tool

GOALS

-  Lower Greenhouse gas emissions
-  Clean air and healthy communities
-  Low emission transport and safer roads
-  Reduce waste and clean water
-  Smarter business practices
-  Warm and dry homes

Free tool to measure emissions for other regions now available!

SERVICES

The Carbon Neutral Advantage team is here to support your business or community to thrive in this changing environment. Please contact us to find out how we can help you.

We can help with:

- Measuring emissions and mitigation opportunities
- Funding opportunities
- Specialist assistance and research
- Renewable energy and energy efficiency opportunities
- LEAN and circular economy techniques
- Offsetting emission opportunities
- Waste reduction and elimination

Help us to build an accurate picture of regional emissions and technology projects by contributing your information and helping us shape goals and collaborative initiatives for the region.

WORKSHOPS & SEMINARS

What is it that you want to know more about? Great South in collaboration with project partners and stakeholders is hosting a series of workshops and opportunities for you to learn more about how you can embrace and implement change to a low emission economy and community.

PARTNERS

The Carbon Neutral Advantage project is being delivered by Great South with funding from the Ministry for the Environment Community Fund and the Tindall Foundation. Great South is building on the successful projects already established in the Southland region and will continue to deliver these projects with those partners.

A steering group of business and community leaders from the region is providing leadership, technical skills and expertise to enable the successful delivery of this project. The steering group is complemented by an advisory group with wider industry and stakeholder representatives.
