POWERING A CLEANER FUTURE

2016 NATIONAL BIOFUELS CONFERENCE

AN INVITATION TO ATTEND

The Biofuels Association of Australia (BAA) is proud to present - with support from the Queensland Government – the National Biofuels Conference 2016.

The biofuels sector is on a cusp of a growth spurt following major policy changes in Queensland and NSW. As demand grows to drive our economy in a cleaner, more sustainable way, biofuels is shaping up as a bigger player into the future.

The Queensland Government has released a detailed plan for the bioenergy sector with biofuels as a major plank.

These developments make this conference, held at Brisbane's premier conference centre, a landmark gathering as the industry develops rapidly. About 300 people are expected to attend the event with a rare mix of speakers, including international experts.

[If you are interested in biofuels and the future this is a must attend conference.](#)

Yours sincerely,

Mark Sutton

CEO – Biofuels Association of Australia

POWERING A CLEANER FUTURE

2016 NATIONAL BIOFUELS CONFERENCE

KEY CONFERENCE THEMES

- The Queensland biofuels mandate – what does it mean for the industry?
- Developing and growing a bio-economy
- Biofuels and the Aviation Sector
- Ethanol Plant Production
- Bio-diesel and a cleaner environment
- Education and public awareness
- New biofuel technology
- Biofuel and developing a sustainable agriculture industry

WHO SHOULD ATTEND

The Conference is attended by senior executives and decision makers from across the industry and supply chains, senior political and government representatives at federal and state level, universities and research institutes, non-government organisations, investors, other key stakeholders, thought leaders and media.

THE BIOFUELS ASSOCIATION OF AUSTRALIA

The Biofuels Association of Australia (BAA) is the peak industry body representing bioenergy producers, marketers, retailers and others with the purpose of providing leadership and facilitating the building of a sustainable, economically viable Australian biofuels industry, consistent with national and community interests and environmental standards.
