## **Wood Energy Symposium Programme 2017**

## Transport World, Invercargill, June 7th 9:00-4:30pm

Time	Topic	Speaker
	egistrations	
Session	1- Welcome and overview by Venture Southland and introductions by EECA and th	e Bioenergy Association
10:00	Welcome	Steve Canny,
		(Venture Southland GM)
10:10	Introduction and overview	Andrew Caseley
		(EECA CE)
10:20	BANZ and Wood Energy South	Grant Smith (Chair)
	Morning tea	
	2- Success stories	
	ssion provides insights into the challenges and opportunities of adopting wood energ	
	f businesses and organisations that are involved in the wood energy sector, what it h	as meant for them or
	asons for considering wood energy in a region where lignite is so cheap.	
10:50	Established in 1923 and based in the South Island, Craigpine supplies timber	Shaun Cawood
	products to local and international markets. Improvements in their kiln and boiler	(CEO)
	controls has allowed Craigpine to consolidate their timber drying to their Winton	
	site and completely eliminate coal consumption from another site. Shaun will	
	outline their process and boiler project and his insight into the wood energy	
44.00	sector and its impact locally.	Jaka Fard
11:20	CH Faul has been providing heating and ventilation solutions to the domestic	John Faul
11:40	and commercial markets since 1949. Over that time, John has seen the changes	(Director)
	that have occurred including the demand for wood boilers. John will outline	
	considerations for businesses evaluating wood boilers and discuss the changes	
	within his business during its transition to being a leading installer of wood	
	boilers in Southland.	Kent Chalmers
11:40	Since 2009, City Forests has been supplying low grade logs into the Otago wood	
	energy market via wood fuel suppliers like Lumber and WENZ. Kent has been involved since its inception and has witnessed the steady and continual growth	(Forest Manager)
	of the market. Kent will discuss the impact this is having on their operations and	
	business as well as his thoughts on the future.	
12:10 -		
	3- Regional and National perspectives	
	ssion will outline the benefits of wood energy for Southland and considerations for ot	her regions. This session
	is on local and regional perspective and the Government's national policy on process	
1:10	MBIE will provide a National perspective and an update on the national stance	TBC
	for process heat, renewable energy and where to government is heading.	
1:30		.50

2:30 2:50 – A	Venture Southland's Steve Canny will provide a project overview and what the project means for the region including economic, business opportunities (waste to energy) and case studies of local businesses and local government who have adopted wood energy in Southland.  Scion's Paul Bennett will present some of the early results from the Wood Energy Symbiosis Project, a Forest Industry / MBIE 4 year research program into NZ Energy options. The research quantifies NZ's energy usage and mix, then presents regional bioenergy options and findings.  Can wood energy improve regional air quality? Otago Regional Council's Deborah Mills will outline their monitoring programme and present some of the data that is coming out of Otago and discuss benefits and challenges faced as a regional authority. What does the future for air quality look like and do wood boilers have a positive role to play?	Steve Canny (Venture Southland GM)  Paul Bennett (Science Leader)  Deborah Mills
2:30 2:50 – A Session	Venture Southland's Steve Canny will provide a project overview and what the project means for the region including economic, business opportunities (waste to energy) and case studies of local businesses and local government who have adopted wood energy in Southland.  Scion's Paul Bennett will present some of the early results from the Wood Energy Symbiosis Project, a Forest Industry / MBIE 4 year research program into NZ Energy options. The research quantifies NZ's energy usage and mix, then presents regional bioenergy options and findings.  Can wood energy improve regional air quality? Otago Regional Council's Deborah Mills will outline their monitoring programme and present some of the data that is coming out of Otago and discuss benefits and challenges faced as a regional authority. What does the future for air quality look like and do wood boilers have a positive role to play?  Afternoon tea	Steve Canny (Venture Southland GM)  Paul Bennett (Science Leader)  Deborah Mills (Air Quality Scientist)
2:30 2:50 – A Session Site visi	Venture Southland's Steve Canny will provide a project overview and what the project means for the region including economic, business opportunities (waste to energy) and case studies of local businesses and local government who have adopted wood energy in Southland.  Scion's Paul Bennett will present some of the early results from the Wood Energy Symbiosis Project, a Forest Industry / MBIE 4 year research program into NZ Energy options. The research quantifies NZ's energy usage and mix, then presents regional bioenergy options and findings.  Can wood energy improve regional air quality? Otago Regional Council's Deborah Mills will outline their monitoring programme and present some of the data that is coming out of Otago and discuss benefits and challenges faced as a regional authority. What does the future for air quality look like and do wood boilers have a positive role to play?  Afternoon tea  4- Site visits  t to Splash Palace where attendees will get an opportunity to see the system operation.	Steve Canny (Venture Southland GM)  Paul Bennett (Science Leader)  Deborah Mills (Air Quality Scientist)
2:30  2:50 – A Session Site visi fuel deli	Venture Southland's Steve Canny will provide a project overview and what the project means for the region including economic, business opportunities (waste to energy) and case studies of local businesses and local government who have adopted wood energy in Southland.  Scion's Paul Bennett will present some of the early results from the Wood Energy Symbiosis Project, a Forest Industry / MBIE 4 year research program into NZ Energy options. The research quantifies NZ's energy usage and mix, then presents regional bioenergy options and findings.  Can wood energy improve regional air quality? Otago Regional Council's Deborah Mills will outline their monitoring programme and present some of the data that is coming out of Otago and discuss benefits and challenges faced as a regional authority. What does the future for air quality look like and do wood boilers have a positive role to play?  Afternoon tea  4- Site visits  to Splash Palace where attendees will get an opportunity to see the system operativery including the recently upgraded fuel delivery system.	Steve Canny (Venture Southland GM)  Paul Bennett (Science Leader)  Deborah Mills (Air Quality Scientist)
2:30  2:50 – A Session Site visi fuel deli	Venture Southland's Steve Canny will provide a project overview and what the project means for the region including economic, business opportunities (waste to energy) and case studies of local businesses and local government who have adopted wood energy in Southland.  Scion's Paul Bennett will present some of the early results from the Wood Energy Symbiosis Project, a Forest Industry / MBIE 4 year research program into NZ Energy options. The research quantifies NZ's energy usage and mix, then presents regional bioenergy options and findings.  Can wood energy improve regional air quality? Otago Regional Council's Deborah Mills will outline their monitoring programme and present some of the data that is coming out of Otago and discuss benefits and challenges faced as a regional authority. What does the future for air quality look like and do wood boilers have a positive role to play?  Afternoon tea  4- Site visits  to Splash Palace where attendees will get an opportunity to see the system operativery including the recently upgraded fuel delivery system.  Site visit to Splash Palace	Steve Canny (Venture Southland GM)  Paul Bennett (Science Leader)  Deborah Mills (Air Quality Scientist)
2:30  2:50 – A Session Site visi fuel deli 3:20	Venture Southland's Steve Canny will provide a project overview and what the project means for the region including economic, business opportunities (waste to energy) and case studies of local businesses and local government who have adopted wood energy in Southland.  Scion's Paul Bennett will present some of the early results from the Wood Energy Symbiosis Project, a Forest Industry / MBIE 4 year research program into NZ Energy options. The research quantifies NZ's energy usage and mix, then presents regional bioenergy options and findings.  Can wood energy improve regional air quality? Otago Regional Council's Deborah Mills will outline their monitoring programme and present some of the data that is coming out of Otago and discuss benefits and challenges faced as a regional authority. What does the future for air quality look like and do wood boilers have a positive role to play?  Afternoon tea  4- Site visits  to Splash Palace where attendees will get an opportunity to see the system operativery including the recently upgraded fuel delivery system.  Site visit to Splash Palace  Transport will be provided to and from the event to Splash Palace	Steve Canny (Venture Southland GM)  Paul Bennett (Science Leader)  Deborah Mills (Air Quality Scientist)
2:30  2:50 - A  Session Site visi fuel deli 3:20  4:30	Venture Southland's Steve Canny will provide a project overview and what the project means for the region including economic, business opportunities (waste to energy) and case studies of local businesses and local government who have adopted wood energy in Southland.  Scion's Paul Bennett will present some of the early results from the Wood Energy Symbiosis Project, a Forest Industry / MBIE 4 year research program into NZ Energy options. The research quantifies NZ's energy usage and mix, then presents regional bioenergy options and findings.  Can wood energy improve regional air quality?
