RECYCLED | RECYCLABLE | BIODEGRADABLE

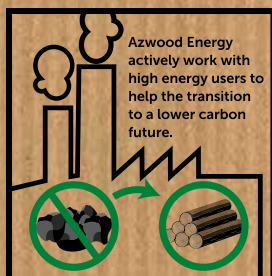

We believe in *being resourceful...*
in making the most of what we have been given

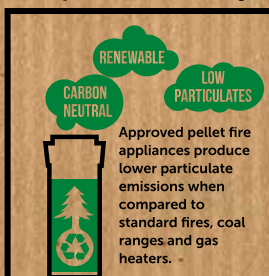

At Azwood Energy, we believe in being resourceful and making the most of what we have been given. We ensure natural resources from our forests are used in the most resourceful way, by creating useful products that are also good for the environment. Azwood Energy's Eco Pellets keep your home warm and improve air quality by reducing the amount of carbon released compared with other fuels.

Choosing Azwood Energy Eco Pellets means choosing a lower carbon future for New Zealand. Azwood Energy supplies biomass hog fuel and wood chip to huge boiler systems that power factories and heat organisations like hospitals and schools. Our wood fuel is a renewable, carbon neutral alternative to fossil fuels like coal, diesel and gas. By using our pellets, you are helping to promote the use of carbon neutral, renewable wood fuels across New Zealand and reducing emissions one Azwood Energy Eco Pellet at a time.
