

Wood / Biomass in Austria

**Example: Clearing of 88 ha
~ 200t/ha = 400 MWh/ha
= 35,200 MWh
...dumped into river banks**

3.4 million tonnes per year of wood residues after harvesting gets wasted and never used. 400000 tonne alone in Taupo, central North Island.

Wood / Biomass in New Zealand

Ministry for Primary Industries
Manatū Ahu Matua

Annual costs associated with hill country erosion are estimated at \$100 million to \$150

\$2.2 million a year is available through a contestable fund for regional projects that help hill-country farmers treat erosion-prone land

Wood / Biomass in New Zealand

Capped area of treated landfill
