

Nature's Flame announce enhanced Canterbury supply base

15 May 2017

Statement from Nature's Flame and Tailored Energy Solutions

Nature's Flame - New Zealand's largest producer of Premium Wood Pellets - has partnered with Tailored Energy Solutions to provide a greater level of service to the Canterbury area.

With growing interest in wood fuels across the world and in particular within New Zealand, Nature's Flame has been active in developing Premium Wood Pellets as a dependable, sustainable, efficient and effective fuel source.

Nature's Flame and Tailored Energy Solutions now offer the confidence of supply out of Christchurch for small through to large customers with 10 and 15kg bags, 1t bags or in bulk delivered to your door.

"Having a strategic supply partner based in Christchurch enables Nature's Flame to continue to deliver the very best customer service to our customers across the Canterbury region" says Scott Fairbairn – Sales and Marketing Manager for Nature's Flame. "We have had a long term association with Tailored Energy Solutions but this extension and increased stock handling facility allows us to ensure supply is secure and provide the best service to current and prospective customers – especially those who rely on the most efficient and stable heating sources for their operation including hospitals, businesses, schools and other vital operations.". "Wood Pellets continue to be one of the best fuel sources and using in place of coal can reduce a number of harmful pollutants into the Christchurch atmosphere. Being Carbon neutral to burn and with significantly lower particulates and other harmful gases, we see Wood Pellets as a great sustainable fuel source for Canterbury organisations" continues Scott.

Desmond Gong – an industry renowned Combustion Engineer remarked "having this increased partnership with Nature's Flame allows Tailored Energy Solutions to be in the centre of discussions with organisations with energy requirements. With a long business history, (and with their coal supply part of the business - Taylor Coal) Tailored Energy Solutions can now supply Wood Pellet fuel and if needed can extend this to help with advice and expertise".

Wood Pellet Fuel is a low carbon, safe and easy to handle fuel source. Nature's Flame Premium Wood Pellets are the only ones produced in New Zealand to achieve the prestigious Din Plus European Fuel standard. This standard ensures the best and most consistent quality is delivered to you all the time. Nature's Flame Premium Wood Pellets are also certified organic by Biogro.

Nature's Flame has a very strong reputation in supplying clean burning wood pellets to many government, council operations as well as small and large businesses and organisations across New Zealand and for domestic home heating.
