

New Zealand takeaways from the UK's Biogas Expo

Martin Campbell-Board
Independent Biogas Systems
Designer and Consultant

Tuesday, 25 August 2026
2:00pm (NZST)

10:00am (AWST), 11:30am (ACST),
12.00 noon (AEST)

About the webinar:

The recent Biogas Expo at the Birmingham NEC was a major event: Two days with ready access to service providers, equipment exhibitors, contacts, examples of technology innovation and a program of expert panel presentations.

There are many biogas plants in the United Kingdom yet very few in New Zealand. Several important motivations for change are prompting renewed interest.

A review of slides and photos from the expo together with informed commentary will help those interested take advantage of European experience to consider useful opportunities for biogas and biomethane in a New Zealand context.

The Bioenergy Association invites all interested parties to attend this webinar, followed by an interactive Q&A session with opportunities for discussion and input.

About the presenter

Martin is a chemical engineer who moved from the New Zealand dairy industry to biogas over 20 years ago.

Working in Southeast Asia he managed a design consultancy responsible for over 40 industrial-scale biogas projects and recently has worked in the United Kingdom and Europe in food waste AD and project development.
